Election/Restrictions

Applicant's election of Species 1 in the reply filed on March 12, 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 8 – 12, 14 – 17 and 19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claims 13 and 18 were further withdrawn from consideration by the Examiner as being drawn to nonelected Species 3 – 5 (Fig. 8 – 10) and Species 6 – 8 (Fig. 12 – 15), respectively. The Applicant concurred with the Examiner's withdrawal of claims 13 and 18 in a telephone interview on March 25, 2009.

This application is in condition for allowance except for the presence of claims 8 – 19 directed to species non-elected without traverse. Accordingly, claims 8 – 19 have been cancelled.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul C. Lewis, on March 25, 2009.

The application has been amended as follows:

Claim 5, lines 4 – 5, the phrase **“disposed at N places (N indicating an integer of 3 or more) with equal spacing,”** has been changed to **- - disposed at N places with equal spacing, N indicating an integer or 3 or more, - - .**

2. The following is an examiner's statement of reasons for allowance: the claimed combination wherein comprising. the first radially outside member opposes the second radially inside member at three or more first positions separately located along a circumferential direction thereby clamping rolling elements therebetween, the rolling elements disposed at the first positions, whereas the second radially outside member opposes the first radially inside member at three or more second positions separately located along the circumferential direction and having a different phase from that of the first positions, thereby clamping rolling elements therebetween, the rolling elements disposed at the second positions, is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
